11:15 am	Hospitality and Social
12:00-1:30pm	Lunch and Program

featuring

## ***National Healthcare Reform***

If you are not sure what the new national healthcare reform will do for you, or you just have specific questions! Please join us as Mr. George McGregor -- a member of President Obama's Health Advisory Committee that developed the initial legislation -- answers many of our questions, including the following:

1. The current status of health reform
2. The impact of health reform on retirees
3. What is the real source of the health care crisis

Currently, George McGregor acts as General Manager for the California Schools Voluntary Employees Benefits Association (VEBA) directly managing the health care of 80,000 San Diegos. He is the founding Director and current Treasurer of the California Health Care Coalition, a membership organization of employers, unions and health and welfare funds, currently representing over 4 million Californians.

Mr. McGregor is frequently asked to speak on the health care crisis. Speaking engagements have included the Conference Board of the World Health Congress; International Foundation of Employee Benefit Plans; and the California Public Employers Employees Health Care Coalition.

If you have often thought of inviting a friend to attend one of our ACSA-R luncheons, THIS IS THE ONE!

Cost \$25.00

**Reservations Due By Monday, January 31, 2011**
